

Do you have hand or arm impairment after a stroke or spinal cord injury?

NOW ENROLLING!

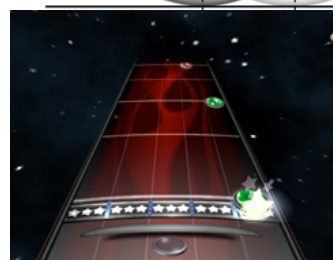

Volunteers needed for a study to improve hand and arm function after stroke and SCI

Purpose of Study:

- To investigate if therapy with simple rehabilitation devices can improve hand and arm function after stroke and SCI

About the Study

- 4 visits to the University of California, Irvine over 8 weeks with trained therapists
- Therapy duration is 3 weeks and may occur at home or in the UCI Medical Center
- \$20 compensation after each visit
- All equipment provided for your home therapy at no cost to you or insurance.
- Lead Researchers of this Phase III study: An Do, MD; Department of Neurology and Kelli Sharp, DPT; Department of Dance
